Forecast for Monday 09 May 2022

Weather: Dry morning with early brightness then thickening cloud. Rain will spread eastwards across the National Park early in the afternoon, becoming persistent and heavier for a time, then turning light and patchy during evening.

Chance of cloud-free hill tops above 800m: 70% reducing 20% in afternoon.

Low cloud and visibility: Mostly good visibility during morning with clouds lifting above many of the tops. It will turn misty early in afternoon as rain moves in, then poor visibility in persistent rain with clouds coming well down the hills.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Feeling increasingly cold on the tops especially when rain arrives and winds reach gale force.

Forecast for Tuesday 10 May 2022

Weather: A brighter day with sunshine and scattered showers. Some heavier showers are likely but they will pass by quickly so still a lot of dry weather during the day.

Maximum wind: Strong southwest winds over higher ridges and summits. Average speeds of 20 to 30mph with gusts 45mph.

Chance of cloud-free hill tops above 800m: 70%

Low cloud and visibility: Good visibility for much of the time with occasional cloud cover about 700 to 800m. Temporary interruptions to poor visibility as showers pass by and clouds briefly lowering.

Temperature: **Valleys:** Plus 7 Celsius rising to 16 Celsius.
At 800m: Plus 5 Celsius.
Freezing level: 1500m.
